Country house project with amazing countryside views and so much potential. Once you enter the property's driveway you will find a 7x3m storage cave which was built 6 years ago and could have a window installed to make it usable for other purposes. There are 2 wells, a bore hole and a water deposit and mains electric. You enter the house via a lovely large front terrace with wooden beams. You enter directly into the living/dining room, which has a wood burner for use in the winter months if needed. The main double bedroom is off to the right hand side, which has a/c/heating. Co
